Dear Mimica,

I am excited to apply for the Product Manager – AI Automation role at Mimica. With extensive experience in agile product development and remote team leadership, I have honed my ability to integrate automation and drive innovation across cross-functional teams. I am drawn to Mimica's forward-thinking focus on leveraging AI technologies.

At Wercflow—an AI-powered workflow platform that helps creative teams find talent, generate documents, and manage media production—I led natural language-driven tool development that transformed creative workflows. I managed a platform with 20k users, secured €620K funding, and achieved a 45% activation rate, ensuring enhanced user experience and clear stakeholder alignment.

I further directed agile roadmap sessions and collaborated with cross-functional teams to scale operations, expanding workflows to 500K and 2.5M users. My strategic approach and data-driven decision-making effectively bridge any gaps in deep technical AI exposure by emphasizing iterative improvements and robust integration processes.

I am confident that my proven record in automation, agile iteration, and strategic roadmap planning will bring significant value to Mimica. I welcome the opportunity to discuss how my expertise can drive outstanding outcomes for your team. Thank you for your consideration; I look forward to speaking soon.

Best,

Isaiah Pegues
