Dear Tabby,

I am excited to apply for the Senior Product Manager, Authorization position at Tabby. With extensive experience in product management and data analysis, I specialize in authentication and identity management, making me well-suited to contribute to your transformation into a full-scale banking app. My proven ability to build secure, scalable systems aligns perfectly with your goal of enhancing user access and compliance in the rapidly evolving financial landscape.

At Resolution, I led the product strategy for authentication tools, serving over 2.5 million users while enhancing security compliance and user experience. My experience in implementing AI-driven automation streamlined security workflows, significantly reducing setup time and boosting customer satisfaction. Additionally, while at Wercflow, I successfully scaled the platform to 20,000 users through a product-led growth strategy, demonstrating strong market fit and user retention.

This approach is documented in my case study, "AI-Driven User Engagement" available at <https://isaiah.pegues.io/case-study-ai-driven-user-engagement>. I am adept at leveraging data-driven insights to enhance user experiences and drive business growth, ensuring seamless access across products while aligning with regulatory standards.

I am eager to bring my expertise in product management and authentication systems to Tabby. I look forward to the opportunity to discuss how I can help shape the foundational identity infrastructure at Tabby. Thank you for considering my application.

Best,

Isaiah Pegues
